

HOW TO DRAW A FACE

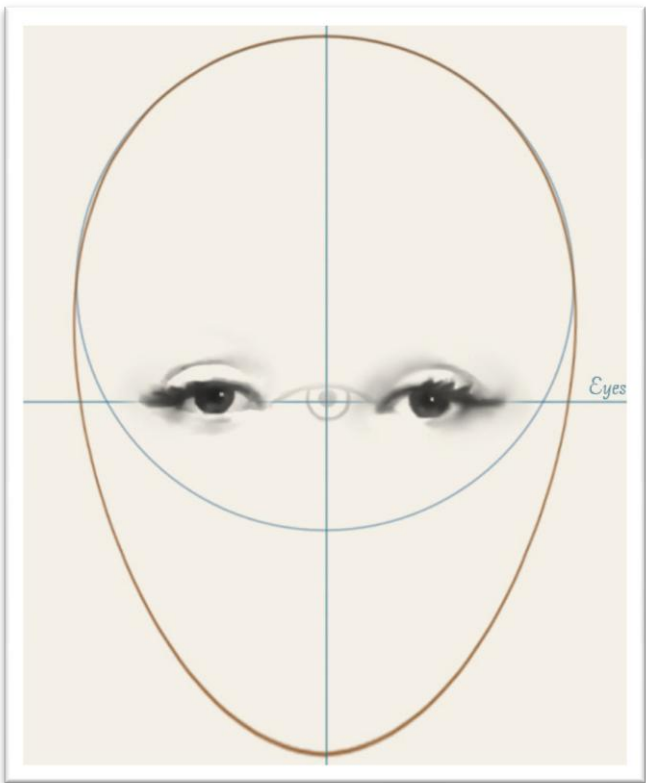

by Stephanie Valentin

Step 1

Draw a circle

Draw an egg

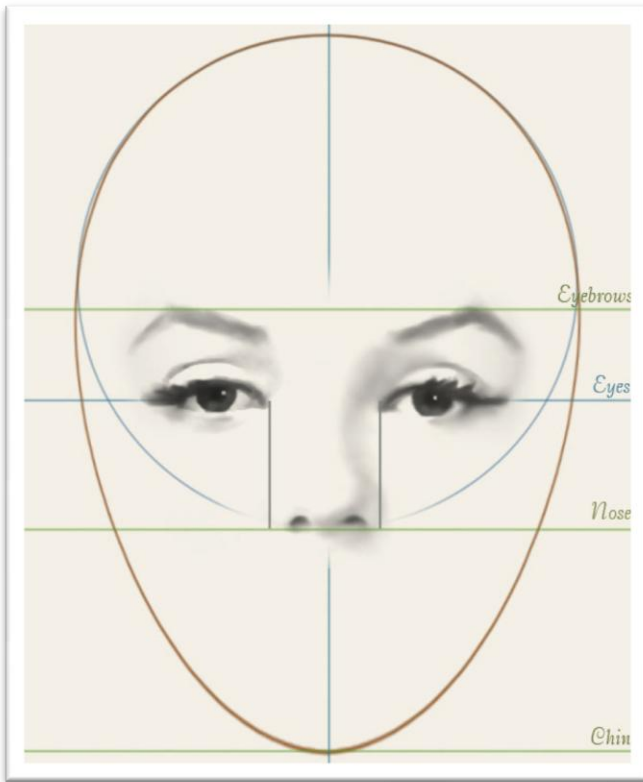

Step 2

Draw a vertical line in the middle of the egg

Draw an horizontal line in the middle of the egg

Draw the eyes on this line - The distance between the two eyes is one eye

Step 3

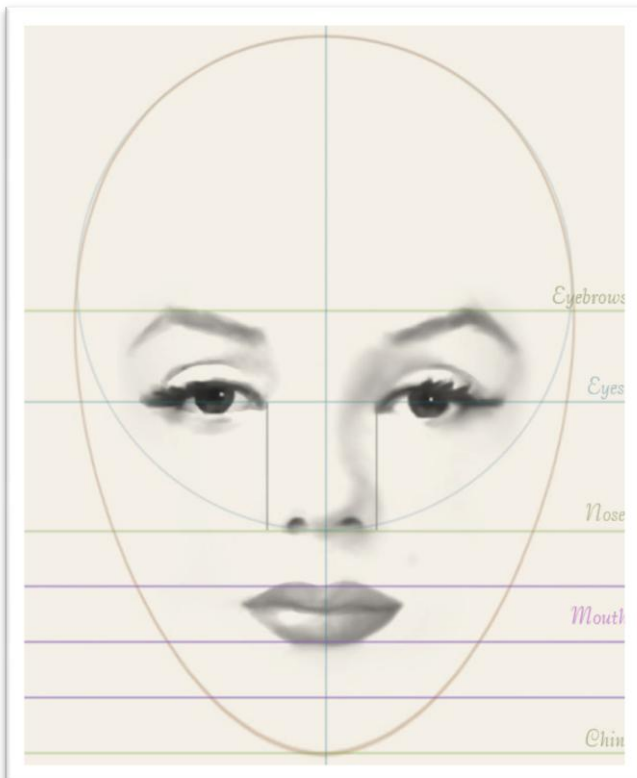

Draw the "chin line" at the bottom of the egg

Draw the "nose line" at the bottom of the circle.

Draw the "eyebrow line" : the distance between chin and nose is the same than nose and eyebrows

Draw 2 vertical lines to define the width of the nose which is the same as the width of an eye.

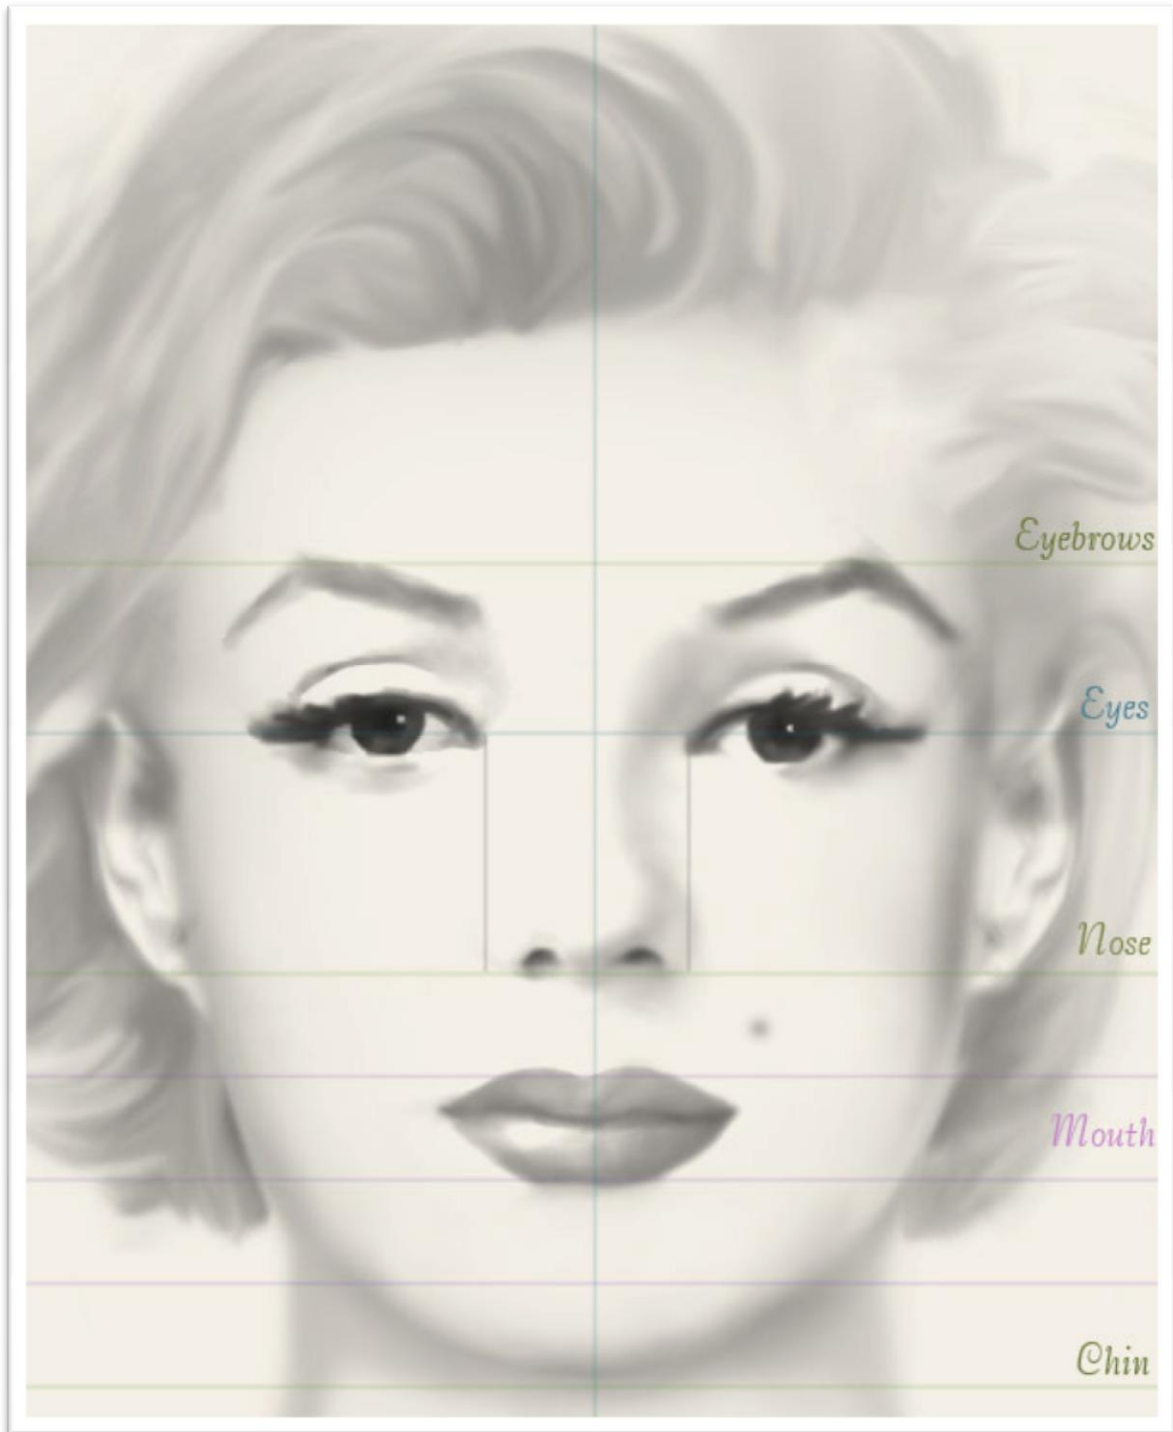

Then you can draw eyebrows and nose

Step 4

Divide the distance between nose and chin in four equal parts

You can draw the mouth between the second and the third lines

Step 5

Draw the shape of the face.

Draw the ears between the eyebrows line and the base of the nose.

Draw the hair

Each face is different then you will have to adapt this proportions to your model.
